

Price for drumscans on ICG 365 I

The scans are scanned and delivered as 8bit AdobeRGB1998 as default.

We scan originals in A3+ and down to the small 110-film.

Start-up-price:

<i>including cleaning and dust removal of the film, mounting and polish of the drum:</i>	30,- Euro
35mm format per frame	30,- Euro
Medium format (6x6, 6x4,5, 6x7, 6x9) per frame	65,- Euro
4x5 inch	100,- Euro
8x10 inch	150,- Euro

All scans are delivered via ftp, dropbox, filemail etc. Originals are returned by mail. Postage will be included in the proforma invoice.

All scans are at 300 dpi default, you are deciding the printsize in mm or cm. Otherwise you order the scans at your preferred dpi. There are no extra charges for the dpi/printsize of the scans. You pay for the labor of cleaning, mounting, scanning, colourcorrecting and shipping. If retouching or post dust & scratch removal is needed, you can order that as extra service for **130,- Euro** pr. Hour of work.

How do you do it?

First you e-mail your order and instructions to erik@tmax100.com and in the reply you will be given the time it will take from originals are received until you have your files delivered. When the originals are received you will be e-mailed a proforma invoice. When the amount of the invoice is paid at the given bank account, the scanning will take place.
